## User Experience Designer

### Full time based in Berlin

We are a Berlin-based start-up active in energy storage systems and electric mobility

Swobbee GmbH  
Johann-Hittorf-Str. 8  
12489 Berlin  
+49 (0)30 639 287 250  
info@swobbee.com  
[www.swobbee.com](http://www.swobbee.com)

Swobbee builds and operates a network of battery swapping stations with the goal to power different forms of electric mobility. We offer a universally compatible charging solution and standardized battery solutions for various light electric vehicles.

This innovative infrastructure is set up in the public space to push forward the energy and mobility transition and ease the traffic pressure in urban areas in Europe and the rest of the world.

# User Experience Designer

## Full time based in Berlin

### That's you

- + A successfully completed degree or 3 5 years of demonstrated experience in creating and implementing UX design in one of the common programs ( Figma , Adobe XD, etc.)
- + Experience in data science is a big plus
- + Experience with coding and ability to troubleshoot using HTML, CSS and comparable languages
- + Ability to prioritize and manage several milestones and projects efficiently
- + Account for challenges using problem solving skills and seek to optimize data for the best possible outcome
- + Experience creating storyboards and website mapping

### Your main tasks:

- + Conduct testing of applications, website and software to assess user experience and ease of design.
- + Build storyboards to conceptualize designs to accurately convey project plans to clients and senior management.
- + Design the aesthetics to be implemented within our website and product, from the layout menus and drop-down options to colors and fonts allowing for interface edits as needed. Everything in harmony with our existing CI.
- + Create surveys for research through various media platforms to gather feedback on user's ease of use and satisfaction interfacing on our website and product.
- + Analyze customer responses and website data to examine high traffic web pages and determine how our webpages can perform better.
- + Enhance user experience by creating seamless navigation through various digital programs and interfaces within the company.
- + Combine interface design concepts with digital design and establish milestones to encourage cooperation and teamwork.

If you do not tick all boxes but do believe that you are the right candidate for the job, please do send in your application . We would love to get to know you and find out if we are the right match for each other.

Please send your application including your cover letter and resume to:
